Foundation of Mechanical Manufacturing Technology

MECH503

Foundation of Mechanical Manufacturing Technology

Instructor Contact Details

Lecturer-in-charge: Dr. Bohao Yang
Email: wlwyxy_29@zju.edu.cn
Office location: Huajiachi Campus, Zhejiang University, Hangzhou, China
Consultation Time: Book appointment by sending email to: wlwyxy_29@zju.edu.cn

Teaching Times, Modes and Locations

Course Duration: 23 Dec 2024 to 10 Jan 2025
Modes: Online/Face-to-face
Location: Anywhere via online, or Huajiachi Campus, Zhejiang University via face-to-face

Academic Level

Undergraduate

Credit Points:

The course is worth 6 units of credit point.

Credit Hours

The number of credit hours of this course equals to the credits of a standard semester- long course.

Contact Hours

The course contains a total of 53 contact hours, which consists of orientation, lectures, seminars, quiz, discussion, research, case study, small tests, assignments, on-site field trip(s), in-class and after-class activities, revision, self-study, and final exam. Students will receive an official transcript which is issued by Zhejiang University when completing this course.

Enrolment Requirements

Eligibility requires enrollment in an overseas university as an undergraduate or postgraduate student, proficiency in English, and pre-approval from the student's home institution.

Course Description:

This course introduces core mechanical engineering concepts including design and mechanisms, intelligent systems, applied materials, and fluid machinery. It provides an overview of the roles, skills, and knowledge required of a Mechanical Engineer, emphasizing the relationship between various subjects in the degree program and their practical application. Additionally, the course covers the fundamentals of machinery manufacturing, focusing on methods for manufacturing metal parts, the technological processes involved, and the performance of commonly used metal materials. Students will learn about the regularity, application, and interrelations of various process methods, as well as the comprehensive comparison of these methods.

Prerequisite:

Prior knowledge in fundamental accounting is required for taking this course.

Learning Resources

- Bird, John, and Carl Ross. Mechanical engineering principles. Routledge, 2014.

Learning Objectives

By the end of this course, you should be able to:

・Develop Communication and Teamwork Skills: Enhance oral communication by presenting in front of a group and develop teamwork, communication, and project management skills.

・Fundamental Mechanical Engineering Knowledge: Understand the fundamentals of machinery, equipment, and manufacturing processes common to mechanical engineering, including hands-on experience with some machining and manufacturing processes.

・Analytical and Problem-Solving Skills: Apply basic statics, dynamics, and thermodynamics to analyze, size, and design simple machines, and develop skills in introductory analysis techniques and problem-solving methods.

・Understanding Mechanical Engineering Discipline: Obtain a broad knowledge of the sub-disciplines within mechanical engineering, the role of a graduate mechanical engineer, and develop research skills using the University of Sydney Library resources.

Course Delivery:

- Online Lecture mode includes lectures, seminars, quiz, discussion, research,

case study, small tests, assignments, online field trip(s), in-class activities, revision, and final exam.

- Face-to-face Lecture mode includes lectures, seminars, quiz, discussion, research, case study, small tests, assignments, on-site field trip(s), in-class and after-class activities, revision, and final exam.

The following course will be taught in English. There will also be guest speakers and optional field trips available for students who would like to enhance their learning experience. All courses and other sessions will be run during weekdays.

Topics and Course Schedule:

WK	Topic	Activities
1	Orientation	
1	Introduction to Mechanical Engineering	Lecture; Tutorial
1	Understanding Mechanical Engineering	Lecture; Tutorial
1	Revision of Mathematics	Lecture; Tutorial
1	Group Project and Project Management	Lecture; Tutorial
1	Project planning Requirements Analysis	Lecture; Tutorial
2	The Effects of Forces on Materials	Lecture; Tutorial
2	Seminar	
2	Tensile Testing	Lecture; Tutorial
2	Forces Acting at a Point	Lecture; Tutorial
2	Quiz	Closed book
2	Bending Moment and Shear Force Diagrams	Lecture; Tutorial
3	Forces in Structures	Lecture; Tutorial
3	First and second moments of area	Lecture; Tutorial
3	Statics & dynamics, fluid dynamics	Lecture; Tutorial
3	Thermodynamics	Lecture; Tutorial
3	Heat Transfer and Fluid Mechanics	Lecture; Tutorial

	Materials and Manufacturing	
3	Revision	Tutorial
3	Final exam	Closed book

Assessments:

Class participation	15%
Quiz	15%
Assignments	20%
Final exam	50%

Grade Descriptors:

HD	High Distinction	85-100
D	Distinction	75-84
Cr	Credit	65-74
P	Pass	50-64
F	Fail	0-49

High Distinction 85-100

- Treatment of material evidences an advanced synthesis of ideas Demonstration of initiative, complex understanding, and analysis.
- Work is well-written and stylistically sophisticated, including appropriate referencing, clarity, and some creativity where appropriate.
- All criteria addressed to a high level.

Distinction 75-84

- Treatment of material evidences an advanced understanding of ideas Demonstration of initiative, complex understanding and analysis Work is well-written and stylistically strong.
- All criteria addressed strongly.

Credit 65-74

- Treatment of material displays a good understanding of ideas.
- Work is well-written and stylistically sound, with a minimum of syntactical errors.
- All criteria addressed clearly.

Pass 50-64

- Treatment of material indicates a satisfactory understanding of ideas Work is adequately written, with some syntactical errors.
- Most criteria addressed adequately.

Fail 0-49

- Treatment of ideas indicates an inadequate understanding of ideas Written style inappropriate to task, major problems with expression.
- Most criteria not clearly or adequately addressed.

Academic Integrity

Students are expected to uphold the university's academic honesty principles which are an integral part of the university's core values and principles. If a student fails to observe the acceptable standards of academic honesty, they could attract penalties and even disqualification from the course in more serious circumstances. Students are responsible for knowing and observing accepted principles of research, writing and any other task which they are required to complete.

Academic dishonesty or cheating includes acts of plagiarism, misrepresentation, fabrication, failure to reference materials used properly and forgery. These may include, but are not limited to: claiming the work of others as your own, deliberately applying false and inaccurate information, copying the work of others in part or whole, allowing others in the course to copy your work in part or whole, failing to appropriately acknowledge the work of other scholars/authors through acceptable referencing standards, purchasing papers or writing papers for other students and submitting the same paper twice for the same subject.

This Academic Integrity policy applies to all students of the Zhejiang University in all programs of study, including non-graduating students. It is to reinforce the University's commitment to maintain integrity and honesty in all academic activities of the University community.

Policy

The foundation of good academic work is honesty. Maintaining academic integrity upholds the standards of the University. The responsibility for maintaining integrity in all the activities of the academic community lies with the students as well as the faculty and the University. Everyone in this community must work together to ensure that the values of truth, trust and justice are upheld.

Academic dishonesty affects the University's reputation and devalues the degrees offered. The University will impose serious penalties on students who are found to have violated this policy. The following penalties may be imposed:

- ✓ Expulsion
- ✓ Suspension
- ✓ Zero mark /fail grade
- ✓ Marking down
- ✓ Re-doing/re-submitting of assignments or reports, and
- ✓ Verbal or written warning.
