Software Quality Engineering and Assurance

Instructor Contact Details

Lecturer-in-charge: Dr. Fengran Hu

Email: wlwyxy_29@zju.edu.cn
Office location: Huajiachi Campus, Zhejiang University, Hangzhou, China
Consultation Time: Book appointment by sending email to: wlwyxy_29@zju.edu.cn

Teaching Times, Modes and Locations

Course Duration: 11 Jan 2026 to 30 Jan 2026
Modes: Face-to-face
Location: Huajiachi Campus, Zhejiang University via face-to- face

Academic Level

Postgraduate

Credit Points:

The course is worth 6 units of credit point.

Credit Hours

The number of credit hours of this course equals to the credits of a standard semester- long course.

Contact Hours

The course contains a total of 53 contact hours, which consists of orientation, lectures, seminars, quiz, discussion, research, case study, small tests, assignments, on-site field trip(s), in-class and after-class activities, revision, self-study, and final exam. Students will receive an official transcript which is issued by Zhejiang University when completing this course.

Enrolment Requirements

Eligibility requires enrollment in an overseas university as an undergraduate or postgraduate student, proficiency in English, and pre-approval from the student's home institution.

Course Description:

This course provides a comprehensive overview of software quality engineering, covering software quality planning, validation and verification methods, risk analysis, and process improvement. Students will learn to define and assess software quality requirements, apply various testing techniques (including fuzz testing and symbolic execution), and understand software reliability models and metrics. The course also explores industry standards such as ISO, SPICE, CMM, and CMMI, equipping students with practical skills to improve software reliability, security, and performance in real-world scenarios.

Prerequisite:

None

Learning Resources

- Software Testing Principles and Practice by Stephen Brown et al., China Machine Press, 2012.
- Software Quality Assurance by Daniel Galin, China Machine Press, 2005.

Learning Objectives

By the end of this course, you should be able to:

· Demonstrate an understanding of software quality processes, risk analysis, and the importance of adhering to industry standards.

· Design and implement effective test strategies and QA procedures to improve the quality and efficiency of software development.

· Analyze the benefits of testing and review processes using models and communicate findings effectively through reports.

· Work collaboratively to develop software quality solutions and apply QA techniques in line with professional practices.

Course Delivery:

- Face-to-face Lecture mode includes lectures, seminars, quiz, discussion, research, case study, small tests, assignments, on-site field trip(s), in-class and after-class activities, revision, and final exam.

The following course will be taught in English. There will also be guest speakers and

optional field trips available for students who would like to enhance their learning experience. All courses and other sessions will be run during weekdays.

Topics and Course Schedule:

WK	Topic	Activities
1	Introduction to Software Quality Engineering	Lecture; Tutorial
1	Software Quality in a Company	Lecture; Tutorial
1	Software Quality Planning	Lecture; Tutorial
1	Software Requirement Specification and Use Cases	Lecture; Tutorial
1	Risk Analysis in Software Development	Lecture; Tutorial
2	Validation and Verification Techniques	Lecture; Tutorial
2	Tools for testing	Lecture; Tutorial
2	Testing Techniques (Part 1): Unit and Integration Testing	Lecture; Tutorial
2	Quiz	Closed book
2	Testing Techniques (Part 2): System and Acceptance Testing	Lecture; Tutorial
3	SQE in agile environments	Lecture; Tutorial
3	Design a weekly agile cycle	Lecture; Tutorial
3	Automated Testing and Analysis	Lecture; Tutorial
3	Software Metrics and Reliability Models	Lecture; Tutorial
3	Revision	Lecture; Tutorial
3	Final exam	Closed book

Assessments:

Class participation	15%
Quiz	15%
Assignments	20%
Final exam	50%

Grade Descriptors:

HD	High Distinction	85-100
D	Distinction	75-84
Cr	Credit	65-74
P	Pass	50-64
F	Fail	0-49

High Distinction 85-100

• Treatment of material evidences an advanced synthesis of ideas Demonstration of initiative, complex understanding, and analysis.
• Work is well-written and stylistically sophisticated, including appropriate referencing, clarity, and some creativity where appropriate.
• All criteria addressed to a high level.

Distinction 75-84
• Treatment of material evidences an advanced understanding of ideas Demonstration of initiative, complex understanding and analysis Work is well-written and stylistically strong.
• All criteria addressed strongly.

Credit 65-74
• Treatment of material displays a good understanding of ideas.
• Work is well-written and stylistically sound, with a minimum of syntactical errors.
• All criteria addressed clearly.

Pass 50-64
• Treatment of material indicates a satisfactory understanding of ideas Work is adequately written, with some syntactical errors.
• Most criteria addressed adequately.

Fail 0-49
• Treatment of ideas indicates an inadequate understanding of ideas Written style inappropriate to task, major problems with expression.

- Most criteria not clearly or adequately addressed.

Academic Integrity

Students are expected to uphold the university's academic honesty principles which are an integral part of the university's core values and principles. If a student fails to observe the acceptable standards of academic honesty, they could attract penalties and even disqualification from the course in more serious circumstances. Students are responsible for knowing and observing accepted principles of research, writing and any other task which they are required to complete.

Academic dishonesty or cheating includes acts of plagiarism, misrepresentation, fabrication, failure to reference materials used properly and forgery. These may include, but are not limited to: claiming the work of others as your own, deliberately applying false and inaccurate information, copying the work of others in part or whole, allowing others in the course to copy your work in part or whole, failing to appropriately acknowledge the work of other scholars/authors through acceptable referencing standards, purchasing papers or writing papers for other students and submitting the same paper twice for the same subject.

This Academic Integrity policy applies to all students of the Zhejiang University in all programs of study, including non-graduating students. It is to reinforce the University's commitment to maintain integrity and honesty in all academic activities of the University community.

Policy

The foundation of good academic work is honesty. Maintaining academic integrity upholds the standards of the University. The responsibility for maintaining integrity in all the activities of the academic community lies with the students as well as the faculty and the University. Everyone in this community must work together to ensure that the values of truth, trust and justice are upheld.

Academic dishonesty affects the University's reputation and devalues the degrees offered. The University will impose serious penalties on students who are found to have violated this policy. The following penalties may be imposed:

- ✓ Expulsion
- ✓ Suspension
- ✓ Zero mark /fail grade
- ✓ Marking down
- ✓ Re-doing/re-submitting of assignments or reports, and
- ✓ Verbal or written warning
